SUMMARY

Backend developer with 4 years of experience building scalable APIs and microservices. Expertise in Python, Java, Spring Boot, REST API design, PostgreSQL, and Docker.

EXPERIENCE

Senior Backend Developer | ByteFlow Inc | Toronto, ON | Jan 2022 - Present

- Built high-throughput REST APIs in Python and Java serving 500k daily requests
- Designed microservices architecture reducing deployment time by 40 percent
- Optimized PostgreSQL queries cutting P95 latency from 800ms to 120ms
- Containerized services with Docker and orchestrated with Kubernetes
- Implemented CI/CD pipelines using GitHub Actions and Jenkins

Backend Developer | StartupXYZ | Remote | Jun 2020 - Dec 2021

- Developed RESTful services in Spring Boot integrated with Redis cache
- Built Kafka message queue consumers for event-driven workflows
- Wrote unit and integration tests achieving 90 percent code coverage

SKILLS

Languages: Python, Java, SQL, Bash

Frameworks: Spring Boot, FastAPI, Django

Databases: PostgreSQL, MySQL, Redis, MongoDB

Infrastructure: Docker, Kubernetes, AWS, CI/CD, Kafka, RabbitMQ

Tools: Git, Maven, Gradle, GitHub Actions, Jenkins

EDUCATION

B.Sc. Computer Science | University of Toronto | 2016 - 2020
